CARMELCREST

Sector: Education  
Client: East Berkshire College  
Value: £45,000  
Duration: 4 weeks (1 week on-site installation)

East Berkshire College (Langley Campus) required a coffee outlet to satisfy local demand. A key requirement was for the design of the "Coffee Pod" (as it is now known locally), to be a close fit with the trendy interior of the college.

Following a successful competitive tender process, Carmelcrest were provided with a detailed brief of the build requirement. Following an analysis of the brief, our in-house designers worked closely with the commissioned Architect, to tweak the original design, in order to ensure a practical build. The trendy design of the Coffee Pod compliments the modern look of the College, appearing as if it has always been part of the building.

The Coffee Pod, which was prefabricated in our joinery workshop in Waltham Abbey, Essex, was manufactured using a timber frame; clad with compact laminate; laced with a Quartz counter top; and finished with stainless steel trims and PVC sheeting. This style of build resulted in a feature light box. Additionally, the Coffee Pod was made using 'maintenance free materials'.

Once designs were finalised, manufacturing and installation was completed in within 4 weeks. East Berkshire College were extremely happy with the finished product; and, as you can see from the picture above, it certainly turns heads.
