CARMELCREST

Sector: Education
Client: Drew Primary School, Newham
Value: £75,000
Duration: 2 weeks

The school wanted competitively priced toilets, but a long-lasting product. Compact laminate was chosen for its durability (which comes in over 100 colours). Wall panels were colour coded to the new cubicles.

All pipe work was concealed but easily accessible. The remainder of the walls were tiled with an anti-slip floor finish, giving a clean, maintenance free space.
