CARMELCREST

Sector: Local Authority
Client: Cambridge County Council
Value: £50,000
Duration: 6 weeks

Due to them being incredibly run down, the toilet facilities located in Madingley Park and Ride Bus Station, a very busy station located in Cambridge, required extensive refurbishment works. Carmelcrest were awarded this contract following a competitive tender process.

The works involved the design, manufacture and installation of all toilet facilities serving the public using the park and ride. Carmelcrest were able to facilitate the design and manufacture of these systems in house. Working with the client and users, Carmelcrest produced designs that made the best use of the space available.

There was a need to maintain public use for 2 out of the 3 toilets at all times, therefore Carmelcrest produced a phased program of works to facilitate this. As a result of the proximity of the public during the works, additional Health and Safety precautions were introduced to ensure public safety. Carmelcrest is expert when working in occupied / controlled environments. 32 years' experience of thriving in this environment has made this so. The project was delivered on time, on budget and to the clients great satisfaction.
