CARMELCREST

This project involved the refurbishment of the staff toilets. The design evolved in consultation with Lisa Daramola, the schools Business Manager, who took the lead on behalf of the school. Lisa wanted an executive look to reflect the school “excellent” off-stead grading. Lisa had her own ideas for the design and together with Carmelcrest designers put together a scheme which complemented the schools image. The work was carried out in term time, which proved very successful, and the school was very please with the outcome.
